Jainam Damanwala

Software Engineer | Backend, Cloud & AI Systems
+1 (908) 342-4987 | jainamdamanwala85@gmail.com | LinkedIn

SUMMARY

Software Engineer with 5+ years of experience building enterprise backend, cloud, data, and AI-enabled systems using Java, Python, Spring Boot, AWS, Azure, and modern DevOps. Proven experience across financial services, streaming media, industrial analytics, and enterprise IT, with strengths in microservices, distributed systems, MLOps, automation, and production reliability.

TECHNICAL SKILLS

Languages: Java 17, Python, JavaScript/Node.js, SQL, C++ **Backend:** Spring Boot, REST APIs, Microservices, FastAPI, Kafka
AI/ML: LLMs, RAG, Agentic AI, LangChain, AutoGen, PyTorch, TensorFlow, Reinforcement Learning
Cloud/DevOps: AWS, Azure ML, Databricks, MLflow, Docker, Terraform, Jenkins, GitHub Actions, Azure DevOps, CI/CD
Enterprise/Infra: Windows Server, Active Directory, VMware, DNS/DHCP, SAP, Microsoft 365, Zebra/Honeywell systems

EXPERIENCE

Strength of Nature Savannah, GA
IT Infrastructure Manager *Mar 2026 – Present*

- Lead enterprise IT infrastructure and technical operations across corporate and warehouse environments, supporting Windows Server, Active Directory, VMware, networking, Microsoft 365, SAP, and business-critical endpoints.
- Automate and standardize provisioning, troubleshooting, access, printing, and device workflows; support Zebra industrial printers and Honeywell RF systems integrated with SAP operations.
- Partner with business teams and vendors on infrastructure upgrades, security, asset lifecycle, system reliability, and technology selection.

Capital One Financial Corporation USA
Software Development Engineer *Aug 2023 – Mar 2026*

- Engineered Java/Python microservices for credit authorization and fraud detection, integrating ML decision layers that improved system adaptability by **27%**.
- Built LLM-enabled rule-learning and transaction-monitoring capabilities with LangChain/OpenAI APIs and collaborated on reinforcement-learning optimization loops.
- Implemented MLflow/Jenkins/Azure DevOps MLOps pipelines and deployed containerized services with AWS CDK and Docker for scalable multi-region operation.

Prime Video & Amazon MGM Studios USA
Software Developer *Sep 2022 – Aug 2023*

- Designed multi-agent and LLM-based workflows for content metadata classification, summarization, and RAG-assisted operational automation.
- Optimized recommendation and engagement ML pipelines with TensorFlow/PyTorch and used Databricks for distributed training and inference.

Exert India
Software Developer *Jul 2019 – Dec 2020*

- Built Python analytics and ML tools for industrial process optimization and prototyped agent-based production monitoring alerts.
- Developed Java Spring Boot REST services integrated with Azure IoT and data analytics APIs.

SELECTED PROJECTS

Agentic AI for Water Systems Optimization: Built a multi-agent reinforcement-learning prototype using LLM reasoning; simulated dynamic constraints and improved modeled distribution efficiency by **19%**.
Autonomous Knowledge Assistant & Forecasting: Built LangChain/AutoGen RAG agents on Azure ML/Databricks and TensorFlow forecasting models reporting **94%** pilot accuracy.

EDUCATION & CERTIFICATION

M.S., Artificial Intelligence, University of the Cumberlands, 2025–2026 **M.S., Computer Science**, Stevens Institute of Technology, 2022
B.E., Computer Science, Silver Oak College of Engineering, 2020
AWS Certified Solutions Architect – Associate
